

ABOUT ME

As a recently Data Science graduate, always eager to learn, I am currently looking for an opportunity to strengthen my skills and deepen my knowledge in data fields. My love for computer science and curiosity are driving forces in my quest to master these ever-evolving technological fields.

ACADEMIC PROJECTS

- Predictive analysis and data visualization on customer satisfaction (from Kaggle) using Streamlit, machine learning pipelines (KNN, Naïve Bayes).
- Create of an interactive sales dashboard with Streamlit (Kaggle).
- RESTful API with Django for library management with a React frontend.
- Data analysis and visualization with R, interactive interface via ShinyApp.
- Dashboard creation from scratch with Tableau.
- Implementate of a neural network with KerasClassifier for classifying insured and uninsured clients.
- Develop a LightGBM model for anomaly detection in network traffic, FastAPI backend and React frontend.
- Automation on Google Cloud Platform (GCP): sending data to BigQuery via Google Cloud Storage.
- Time series analysis and forecasting (from sensors) using regression, ARIMA, SARIMA, RNN, LSTM.
- Data analysis on Databricks with Spark.
- Setup of a data platform with Docker, Minio (object storage), PostgreSQL (database), and Polars (preprocessing).
- Create a hybrid model using U-Net and Deeplab V3+ for Brain tumor detection (My thesis topic).

EDUCATION

- | | |
|---------------|---|
| (2023 - 2025) | Higher Institute of Computer Science, Dakar, Senegal
Master's degree in Data Science and Artificial Intelligence. |
| (2019 - 2023) | Higher Institute of Technology / University of Bangui, (Bangui, Central African Republic)
Bachelor's degree in Computer Engineering, Networks and Systems specialization. |

CERTIFICATIONS

- | | |
|--------------------|---|
| (March 2026 - Now) | Graffingstone training College, Nairobi, Kenya
English course |
| 2025 | AWS Training & Certification
Introduction to Amazon DynamoDB |
| 2025 | AWS Training & Certification
Getting Started with AWS Systems Manager. |
| 2025 | AWS Training & Certification
Building a machine learning ready for organization |

SKILL

• Python • BigQuery, Cloud Computing(GCP) • SQL and databases • DBT • AirFlow • Data transformation (ETL) • Process automation (Pipelines) • Advanced data preprocessing and analysis • Data visualization (Matplotlib, Seaborn) • Advanced data visualization with StreamLit • Business Intelligence tools (Tableau, Power BI) • Excel • Big Data (Spark, Polars) • Machine Learning • Deep Learning (TensorFlow, PyTorch) • Data development environments (Jupyter, RStudio) • R • API development (Django, Flask, FastAPI) • Frontend • Tools (Git, Docker)

SOFT SKILL

- Excellent communication and interpersonal skills • Teamwork and collaboration abilities
- Problem-solving and critical thinking • Adaptable and quick to learn
- Good time management and organization • Initiative

LANGUAGES

- French: Excellent • English: Intermediate.
